🔗 MSA-209

Education

2022–2026 **B.S. in Computer Science**, *Georgia Institute of Technology*, Atlanta, GA, GPA: 3.89/4.0

- Minor in FinTech
- Threads in Information Internetworks and Intelligence

Projects

2023–2024 **Military Educational App**

- Led a team of 4, effectively communicating with the client to ensure project alignment with their needs
- Integrated database technologies into the app, enhancing client-side interaction and user experience
- Integrated requested features from client using Javascript improving the app's use cases for over 50,000 users
- Leveraged Figma and Maze for innovative front-end design, improving the app's usability

2023 **Game Suite**

- Completed a five-person large-scale programming project using Android Studio that implements 3 separate games
- Used agile principles to iteratively develop and change application based on user feedback
- Analyzed specification requirements using domain models, use cases, and robustness diagrams
- Showcased familiarity and implementation of various design patterns such as singleton and strategy to reduce code by 20%
- Managed code repositories using Git, facilitating smooth collaboration among team members
- Integrated SOLID and GRASP principles in various software design problems
- Used TDD throughout the project, ensuring high-quality code and efficient debugging process
- Applied OOD and OOP skills through the design and implementation of the individual games

2025 **Apple Card**

- Analyzed the US credit card industry (\$1.21T debt) to identify fintech growth opportunities by addressing consumer pain points like complex rewards/fees, security vulnerabilities, and exclusionary underwriting.
- Conducted an in-depth case study of the Apple Card, evaluating its strategy to simplify rewards/fees, enhance security, and its market impact (12M+ users, partner losses, competitive interest).
- Assessed competitive responses from traditional finance (e.g., Capital One/Discover merger, new card products) and concluded limited overall market disruption by the Apple Card despite user adoption.

Research

- 2024 **Research Assistant**, *College of Computing*, Georgia Institute of Technology
- Researched various generative AI tools for design and implementation of software processes
 - Designed various diagrams for ChromeOS Whiteboard using LucidChart, Eraser.io, and Figma
 - Involved in the development of various MMFs for ChromeOS Whiteboard using modified MERN stack
 - Reviewed students diagrams on the quality created and gave feedback on how to improve future diagrams
 - Highlighted AI tool impact of increasing productivity by around 50% compared to traditional methods

Experience

- 2024–Present **Web Designer Specialist**, *Super Purposes*
- Conceptualize and create intuitive, engaging, and brand-consistent web experiences
 - Continually improve and optimize user experience for sites using HTML and CSS
 - Collaborate in concept development and design ideation cross-functionally
- 2024–Present **Grader**, *School of Mathematics*, Georgia Institute of Technology
- Grade and proctor hundreds of students in statistics and applications
 - Interacted with professors on creating consistent grading rubrics
- 2022–Present **Member**, *GreyHat*, Georgia Institute of Technology
- Discuss practical skills in analyzing, exploiting, and defending computer systems
 - Participate in CTFs covering different areas such as reverse engineering
 - Explore the basics of cryptography such as symmetric and asymmetric cryptography

Technical Skills

- Programming Python, JavaScript, Java, C, ReactJS, HTML, CSS, SQL
- Technologies MySQL, Firebase, React, Node.js, Express.js, JavaFX, Git, GitHub, Jira, Figma, Postman, Docker, Jupyter Notebook, NumPy, Pandas, Android Studio
- Concepts Detailed Design Documentation, Product Management, Agile Development, Scrum
- Coursework Object Oriented Programming, Objects and Design, Data Structures and Algorithms, Artificial Intelligence, Systems and Networks, Computer Networking, Database Systems

Technical Certificates

- edX Introduction to Computing using Python
- Programs
